

CIC'S ELECTRONIC SIGNATURE TECHNOLOGY LICENSED BY JETFORM

Redwood Shores, CA, June 13, 2001 - (NASDAQ:CICI) Communication Intelligence Corporation ("CIC"), enabling the world with "The Power to Sign Online™", announced today that it has entered into a licensing agreement with JetForm® Corporation (NASDAQ: FORM, TSE: JFM) for CIC's InkTools®, electronic signature Software Development Kit ("SDK").

Under the agreement, JetForm will incorporate CIC's technology into JetForm's mobile e-forms solution, PocketForm™. This will allow mobile computing professionals using e-forms to collect data and complete business transactions with a legally binding electronic signature.

"CIC's technology enables e-businesses to securely complete all transactions with customers, suppliers and partners that require signed documents and data," said Jeff Sandler, vice president worldwide sales for CIC. "JetForm's customers, worldwide, will have access to a fully integrated e-forms and e-signature mobile offering available for a broad array of applications."

"We have chosen CIC because of its proven technology and expertise in electronic signature solutions, specifically within the mobile environment," said David Welch, vice president and general manager of JetForm's e-form's business group. "Incorporating CIC's technology into our mobile product offering enhances our initiative for deploying best-of-class solutions that reduce costs, increase security and improve customer service."

InkTools is a high performance SDK for implementing systems using electronic ink or handwritten electronic signatures. InkTools provides electronic signature capture and display, biometric signature verification and ink compression as well as other encryption and hashing algorithms that add value to a wide variety of document and transaction based applications for the Windows, Windows CE, Palm and Linux operating systems.

About CIC

Communication Intelligence Corporation (CIC) is the leading supplier of natural input and electronic signature solutions for wireless Internet and e-Commerce applications enabling the world with "The Power to Sign Online™". The Company's core software technologies include multilingual handwriting recognition systems, biometric signature verification, natural messaging, and operating system extensions that enable pen input. CIC's products are designed to increase the ease of use, functionality, and security of wireless electronic devices ranging from handheld companions to cellular phones. Ericsson, Fujitsu, Hitachi, Microsoft, Mitsubishi, National Semiconductor and IBM among others have licensed the company's technology. CIC is headquartered in Redwood Shores, California and has a joint venture, CICC, in Nanjing, China. For more information, please visit our website at <http://www.cic.com>

Certain statements contained in this press release, including without limitation, statements containing the words “believes”, “anticipates”, “hopes”, “intends”, “expects”, and other words of similar import, constitute “forward looking” statements within the meaning of the Private Litigation Reform Act of 1995. Such statements involve known and unknown risks, uncertainties and other factors, which may cause actual events to differ materially from expectations. Such factors include the following (1) technological, engineering, quality control or other circumstances which could delay the sale or shipment of products; (2) economic, business, market and competitive conditions in the software industry and technological innovations which could affect the Company’s business; (3) the Company’s inability to protect its trade secrets or other proprietary rights, operate without infringing upon the proprietary rights of others or prevent others from infringing on the proprietary rights of the Company; and (4) general economic and business conditions and the availability of sufficient financing.
